

Junior consultants (pre-hiring internship)

About us

As part of LTIMindtree's "Banking Transformation Practice - powered by Syncordis", we are proud to fully support banks and financial institutions of all sizes on their digital transformation journey in this fast-paced environment. For over 25 years, we have delivered excellence in end-to-end implementation projects for banking solutions and go the extra mile to enable our clients to leverage their capabilities and innovative power to shape the future of banking.

An integral part of our DNA is our passion for IT Services, Consulting and Finance and our enthusiasm for collaborative work. With +1000 trained Consultants in our 10 offices worldwide, people are the key to our success. As the leading-industry expert and through our unique training and mentoring programs, our mission is to make YOU the key player in the digital transformation of tomorrow's bank.

In line with LTIMindtree Group values, we are deeply committed to building an aware, inclusive, and diverse working environment for all our employees.

Ready to find your future-leading roles in Consulting? Embrace Your future now with our Banking Transformation Practice to #futurefastertogether!

What we offer:

We are currently looking for end-of-studies trainees (6 months) to join our Luxembourg office to become our future junior consultants!

You will be a member of one of our consulting teams and you will be fully integrated to both internal and clients' projects with the help and coaching of our senior consultants.

We offer training and mentoring programs to help each consultant in their career boost!

What are you going to do?

- Be part of clients' projects and work on business analysis, development & testing projects, as well as on cloud technologies and automation (RPA)
- Be involved in internal projects to improve transversal processes and technologies
- Help our project management office (PMO) team on tools' optimization (JIRA)
- We also offer dedicated internships to cybersecurity and to IT support & administration (networks, environments)

Your profile:

- Finalizing master's degree or bachelor's degree in: Information Systems Management, Computers Sciences, Finance, Banking or Business Engineering.
- Curious about banking environments and processes, about digital transformation and next-gen technologies
- Interested in the versatile aspect of consulting projects (technical, functional, business, project management)
- Fluent in a both French and English
- Have proven analytical and problem-solving abilities.
- Great team player with a can-do attitude
- Good oral and written communication skills with an interest in client-facing
- Be service-oriented
- Eager to learn and grow!

Equality, Diversity, and Inclusion (EDI): EDI is an integral part of our company values. We also deeply believe that everyone should be treated equally, according to the same rules and principles regardless of their race, disability, gender, and sexual orientation.
