DevSecOps Trainee

We, at Arηs, want to build teams based on **young peoples** who desire to perform, improve their skills, and build a **rewarding career**.

To these **brilliant minds**, we offer the best place to work, the most interesting projects using the **latest technologies**, always in a practical domain where they **can immediately see** the impact of their **own progress**.

You are **talented**, **motivated** and **ambitious**? Then, we will be more than happy to **meet you**!

#Keywords

- CI/CD;
- Cybersecurity;
- OWASP;
- Docker;
- Kubernetes;
- Ansible;
- Terraform.

As a DevSecOps trainee, you will:

- Your main task will be to support the cross-team initiative to improve continuous integration and continuous delivery process… while ensuring security at every step;
- Among the topics you will cover:
  - Support the containerization of our various projects and migrate them to Kubernetes;
  - Improve on-premises CI/CD processes;
  - Optimize the various jobs in our pipelines (build, code quality, packaging, deployment);
  - Manage development environments;
  - Create monitoring dashboards and dedicated metrics;
  - Support the development team in the development of their CI/CD pipeline;
  - Integrate security aspects throughout CI/CD pipelines following best practices.

We are looking for a student:

- Curious and creative;
- In the love of code;
- Team player;
- With an interest for state-of-the-art technologies;
- Concerned by security;
- Autonomous and dynamic.

What we offer to the candidate:

You will join an existing team and be fully involved in the project. This will be a unique opportunity for you to work on a strategic tool that will be used by the community. You will be integrated in an exciting company hiring dozens of young graduates each year. If you want to grow up with us, please send us your CV.
